

MindPoint Group Capabilities

DYNAMIC CYBERSECURITY SOLUTIONS FOR EVOLVING THREATS

MindPoint Group helps identify and defend against threats, close security gaps, manage risk—transforming your cybersecurity posture in the process.

About MindPoint Group

MindPoint Group is a trusted security consulting firm with an extensive list of customers, and a history of outstanding service delivery. We stay true to our founding partners' original mission: becoming the trusted cybersecurity partner and advisor to each of our customers by consistently exceeding their expectations.

Our Team

Headquartered in Alexandria, VA, we are over 100 expert-level cybersecurity professionals. From the beginning, we have placed a premium on our employees. Our consistent ability to retain and enable our team to excel personally and professionally is key to our capability. We have a TS facility clearance and 90% of our customer-facing employees are cleared.

Service Areas

We are a full-service cybersecurity organization. Our expertise includes:

- | Governance, Risk, and Compliance (including FedRAMP 3PAO)
- | Security Operations, SOC-as-a-Service
- | FedRAMP, vulnerability, security, defensive posture, and third-party assessments
- | Vulnerability analysis and penetration testing
- | System, cloud, and security architecture design, automation, and implementation

DoC

Capabilities that Deliver Results

- | Developed and operated customer's multi-tenant collaboration environment and custom application development. **Result: Savings of \$4.5M over 5 years.**
- | Migrated entire customer classified IT environments to newly designed and implemented managed virtualized infrastructure. **Result: Decreased deployment times and increased resiliency.**
- | Deployed critical technologies to enable us to provide security monitoring and incident response for the environment and all hosted applications. **Result: Delivered a fully cloud-based cyber operations capability.**
- | Led the comprehensive overhaul of capabilities, including migrating log aggregation capabilities and customer SIEM to enterprise Splunk, replacing the customer case management system, and implementing advanced enterprise endpoint tools. **Result: Reduced time-to-detection, increased detection capability.**
- | Designed, implemented, and manage customer's Security Operations as a Service. **Result: Delivery of the first available US Government SOCaaS offerings.**
- | Performed code reviews and application penetration testing support for over 150 applications that undergo configuration change testing requests 200 times per year. **Result: Consistently validated secure applications.**

Notable Achievements

- | 2019 GSA Centers of Excellence BPA Awardee
- | 2019 Washington Business Journal Best Places to Work
- | 2018 NASA Recognition of Excellence

By the Numbers

- | 30% of our workforce are veterans.
- | 55% of our workforce are minorities.
- | 96% Dun and Bradstreet rating.
- | 5-star Glassdoor employee rating.

Core Values

We focus on one and only one thing: IT security, and we've built this entire company around core values that enable us to deliver the best services available:

- | **Trust and mutual respect** - A diverse workforce is crucial for any business, we respect these differences and always address one another in a respectful manner.
- | **Honesty** - We expect our employees to be honest and transparent with our customers and one another.
- | **Accountability** - Everyone at MindPoint Group is accountable for his or her actions, including to our teams, customers, partners, and actions.
- | **Focus and direction** - Our only focus is cybersecurity.
- | **Innovation** - We think outside of the box, and develop new ways to solve today's cybersecurity challenges.
